

Hi there, I'm Chenhanting

MEDIUM.COM

UP

I'm a FrontEnd, BackEnd Developer

- 🚀 This is my recent React Page: [React Han!](#)
- 🚀 This is my recent Rails Page (Haven't updated since 2019): [Rails Han!](#)
- 🌱 I'm currently learning everything 🤪
- 📅 2020 Goals: Become a mature FullStackr
- ⚡ Fun fact: I love to dance / pops, and this is my Dancing Video during [2014](#)

Education:

- 🏫 Song Sang Senior High (2009.09 - 2012.06)
- 🏫 National Taipei University Electrical Engineering (2012.09 - 2016.06)
- 🏫 Song Sang Senior High Electrical Engineering (2016.09 - 2019.01)

Experience:

- 📄 JVD (2019.09 - 2020.01)
- 📄 Eslite (2020.02 - until now)

Certificate:

- 🏆 TOEIC (Score: 730)

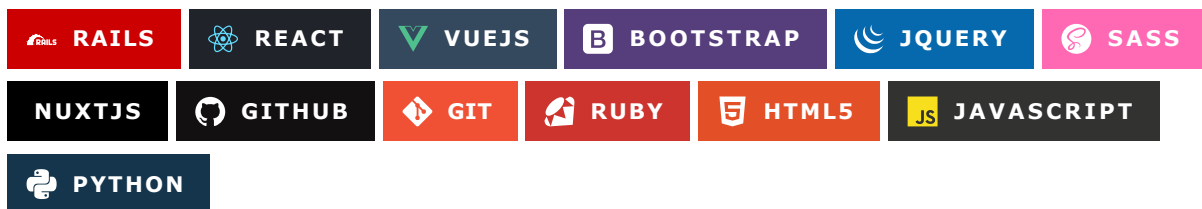

What I've Done:

- First job
 - UI for game lobby
 - Docking and refactor with some games (with API), including sign in, sign up, credit, billing, ckeckout.
 - Game information station CMS: like system, post, comment, ckeditor.

Check out [here](#) if you want to see more what I do in my first job.

- Second Job
 - Backend:
 - Import a bunch of category data using rake and roo.
 - (Admin) Some CRUD in customer service.
 - (Admin) Create and split orders
 - (API) Wish list API
 - (Admin+API) reCAPTCHA
 - Frontend
 - Eslite home page
 - Eslite category page
 - Eslite book exhibition page

What I've Learned:

- General
 - Learn how to collaborate with Designer and Project Director
- Authentication (Cookie-based and Token-based Authentication)
 - Recaptcha enterprise
 - Backend: Communicate with reCAPTCHA API and frontend.
 - Frontend: Display reCAPTCHA and return necessary value to backend.
- CSS
 - Bootstrap
 - Policy related to size
 - flex and flex with bootstrap
 - Grid (Only use on my project)
- CSS interact with Javascript
 - Slides in swiper with the size changed in mobile size.
 - Change background color when the slide changed.
 - Sidebar
- Javascript

- Functional Programming Paradigm
- Vuex, Redux
- React Hooks (Only useState, useReducer, useContext)
- Ramda, Lodash
- Swiper
- Vue
 - Basic attributes like data, props, methods, created, updated, filter, mounted
 - Formatting data and store data to vuex(if need) before using it.
 - Dynamic loading component using `component` (book exhibition page)
- Rails
 - Basic Gem like Cancancan, Audited, AASM, Ransack.
 - Adding vue component in rails project.
